

TEXAS TECH COLLEGE OF ARCHITECTURE SPRING 2018 LECTURES & EVENTS

From furniture and buildings to systems and territories, *DISTANCE* examines the interstitial space between and beyond the thematic outposts of architecture discourse. Spaced across hundreds of miles of the West Texas region, the Texas Tech College of Architecture Spring 2018 lecture and events series will take place across two cities—Lubbock and El Paso—to embrace an expanded audience and uncover new ground for the discipline of architecture.
