From furniture and buildings to systems and territories, DISTANCE examines the interstitial space between and beyond the thematic outposts of architecture discourse. Spaced across two cities—Lubbock and El Paso—to embrace an expanded audience and uncover new ground for the discipline of architecture, Pestipher and colleagues will take place across two cities—Lubbock and El Paso—to explore and expand theoretical horizons of the West Texas region. For more information on the lecture series please visit the TTU COA website.

All lectures at TTU COA Lubbock will be held in the College of Architecture first floor gallery.
