

Cochran County Park, Morton, Texas

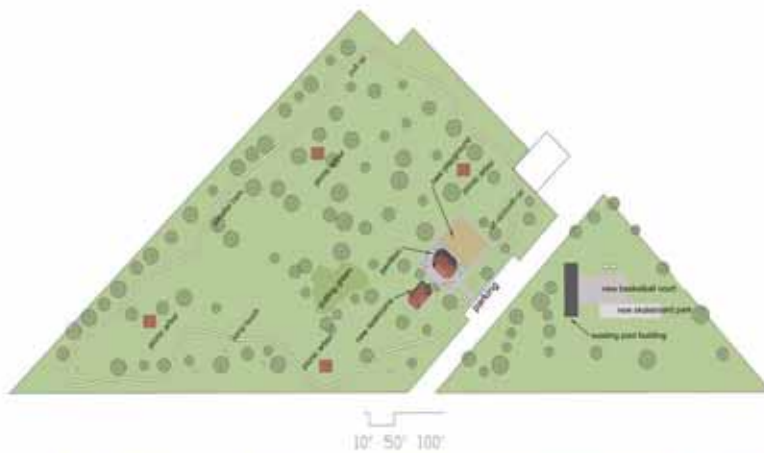

2003 Spring-Summer: CDS Funded Research/Community Service

Project Manager/Principle Investigator: Ben K. Shacklette, AIA

Research Assistants: Bart Shaw, Brent Wright, Pavlina Ilieva

Project Description:

After receiving a \$50,000 matching grant from Texas Parks and Wildlife Cochran County officials enlisted the CDS to study the rehabilitation of the existing county park located outside of Morton, Texas. A popular place for community gatherings the existing support facilities needed to be improved, and the new building program called for the addition of a pavilion, covered picnic tables, and a new restroom building. Additional design considerations included park equipment, new playground, and walking path. A series of design schemes were developed and presented to community members including cost estimates. After a consensus was reached the CDS produced a set of construction drawings for bidding and final construction.
