

Christian Reta Critique

While reading this page from Cecilia I really liked how she painted the block and how she related that to a rain drop. I really liked her design but I still think that she should add more cuts to the block itself. Also I think she should be able to make the void of the cube stand, I believe she made some cuts that were not good, for the block to be able to stand. For her essay to be longer I think she should explain more in depth the cuts she made on the cube, because I really did not understand all the cuts and if I was trying to replicate this I probably would not be able to make it. Also I think she should explained what other else inspired her while creating this cube, I did understand what she was saying about the rain drop, but maybe she should talked more in depth about her inspiration. She should also explain what kind of machines she used to cut the cube. I also think it would be good she included how long it took her to complete this composition of this object. Also when directing light on the cube she should try to but the light closer and more in the middle of the cube just so that the light can go into the openings of the cubes. Also I think you should add some more profile pictures and have the shadow on the background. Overall I think you did a good job in creating this cube and I think your going to do a better job on the next iteration.
